PROFILE

I am a highly skilled web developer and designer with a deep passion for creating visually appealing and user-friendly digital experiences. With a strong understanding of both front-end development and design principles, I focus on building websites that are not only aesthetically engaging but also highly functional and accessible to all users. I have experience working with a complex platform, as well as developing features for multiple clients My goal is to craft responsive, inclusive websites that provide seamless interactions for every user, regardless of their abilities or devices.

WORK EXPERIENCE

Junior Software Developer

Sportradar Media Services GmbH, Vienna, AT

2023 - Present

I work daily with a wide range of technologies including HTML, CSS, PHP, Laravel, JavaScript, VueJS, TypeScript, and MySQL, with a special emphasis on the design and user experience side of development. My role involves implementing and designing visually compelling user interfaces, ensuring every visual element aligns with both user needs and brand identity.
Key Contributions:

- Designing and implementing new visual elements with attention to aesthetics, usability, and accessibility.
- Leading the design and development of interactive features for sports websites and video streaming platforms, focusing on seamless user experiences.
- Collaborating in product decision-making and offering design insights to improve user interaction and overall site functionality.
- Continuously improving and designing complex content management systems with a focus on intuitive navigation and responsiveness.
- Crafting and refining visual styling using Sass, SCSS, and CSS to create polished, modern layouts.
- Participating in workshops to design new product features, including wireframing, creating user flows, writing user stories, and developing detailed scenarios.
- Staying up-to-date with the latest design trends, technologies, and frameworks to keep my work innovative and fresh.
- Exploring AI tools like Copilot to enhance design processes and improve efficiency in design-to-code transitions.

Intern Development Coding Academy

Sportradar Media Services GmbH, Vienna, AT

2022

Key Design Contributions:

- Designed and implemented a user-friendly sports event calendar, focusing on an intuitive layout and seamless functionality for adding or removing events.
- Developed wireframes and user flows to establish clean, organized structures before implementing new features, ensuring a solid foundation for user interactions.
- Created visually appealing, responsive interfaces that enhanced user engagement, ensuring design consistency across the project.
- Gained hands-on experience in translating design concepts into functional code, refining my ability to balance aesthetics with technical functionality.
- Participated in code pairing sessions, collaborating with mentors to refine design approaches and strengthen my understanding of clean code practices in the context of UI/UX.
- Completed numerous challenges that involved integrating design thinking with practical development, such as structuring APIs, refactoring code, and testing endpoints.
